

Global Small Male GSM

General Description

The Allflex small male is precisely engineered for strength and stability. The small male has been reinforced at the critical stress points and is manufactured of high grade polyurethane. It features a self-piercing tip for quick and easy application of Allflex tags.

Construction

The small male is made of Polyurethane with a Zamak metal tip. The Stem length is 14mm (.47"). The weight of the Small male is 1.9 grams.

Performance Capabilities

The following EID Tags use the Global Small Male as a standard. This stem length allows for the proper air gap for retention and healing.

FDX Lightweight Ultra EID Tag (Sheep and Goat Application)

FDX Lightweight Ultra Swine EID Tag (For Piglet and Feeder Pig Application)

(The default color is White unless otherwise specified)

This small make is used on all Allflex Visual tags. The shaft length is the proper length for placement of visual tags in all species due to application site.
